EDUCATION

University of California, Berkeley

B.S. Electrical Engineering and Computer Science

GPA: 4.00

Relevant Coursework: CS 61A (Structure and Interpretation of Computer Programs), EE 16A (Designing Information Devices and Systems I), Math 53 (Multivariable Calculus), CS 61B (Data Structures), CS 70 (Discrete Mathematics and Probability Theory), EE 16B (Designing Information Devices and Systems II), CS 198-082 (Machine Learning DeCal)

Current

Aragon High School

GPA: 4.00 unweighted, 4.62 weighted, Valedictorian, National Merit Scholarship recipient

2014 to 2018

PROJECTS

Kiwi Maintenance

A React/Node.js web-app to read and write from an Airtable database using their RESTful API, as well as sync the tables by updating the registry table as entries are added to the updates table.

March 2019 to March 2019

WriTeX

An in-progress project that attempts to take a photograph of text, symbols, and equations and provide a version written in LaTeX or plain text. Uses sci-kit learn, PyTorch, Tensorflow, as well as MNIST and external data.

March 2019 to Current

Rocky Stocks (Cal Hacks)

Utilizes Blackrock's Aladdin API and News API to predict changes in stock performance by analyzing text data from global news publications. I designed the project and led the development, working on the Python back-end and Flask integration.

November 2018

SKILLS

LANGUAGES: Python, Java, HTML/CSS, JavaScript, SQL

LIBRARIES/Frameworks: Tensorflow, PyTorch, React Native, Node.js, Express, JQuery, Django

AWARDS

Siemens Research Competition Semifinalist, Siemens Corporation

Top 400 students chosen from 2000 projects.

2017

US Physics Olympiad Medalist, American Association of Physics Teachers

Among top 100 competitors in the USAPhO. Qualified 3 years in a row.

2016

American Mathematics Competition, Mathematical Association of America

AMC 12 Distinguished Honor Roll (top 1%), 7x AMC Honor Roll (top 5%), 4 time AIME (American Invitational Mathematics Examination) qualifier

2017

ACTIVITIES

Kiwi Campus, Maintenance Intern/ Full Stack Developer

Began as a maintenance intern for their autonomous delivery robots, but after recognizing inefficiencies in the maintenance workflow, developed a full stack web app to track and edit the robot registry and wrote analytics to determine and predict robot breakdowns.

February 2019 to Current

EE 16A Course Staff, Employee

Reader for EE 16A course at Berkeley. Also a lab intern volunteer for CS 61A.

January 2019 to Current

Garcia Center for Polymers and Engineered Interfaces, Researcher

Led a group in materials science/biology research, resulted in paper and a presentation at the Material Research Society symposium

June 2017 to November 2017

SKT Lab, Frontend Developer Intern

Helped design and develop <http://sktlab.com/>. Used HTML, CSS, PHP

June 2016 to August 2016
